

USB 2.0 External VGA Video Card (GUC2015V)

Add another VGA monitor to your computer or laptop through a USB port

Model # GUC2015V

Description

The USB 2.0 External VGA Video Card allows you to connect an extra monitor to your desktop PC or laptop's USB port. The connected monitor can be configured to either clone your primary screen, or extend the Windows desktop allowing visibility of more applications at the same time.

The USB 2.0 External Video Card driver used to control the extra screen uses very little computer resource and offers a vast array of screen resolutions and color depths. This ensures that there is little difference in performance between a directly connected screen and a screen connected through the USB 2.0 External Video Card

Features

Office Use:

- View large spreadsheets across two screens with display continuity
- Multitask more effectively without overlapping windows
- Open attachments on one screen while reading the e-mail on the other

Mobile Use:

- Do multiple screen displays and presentations without bringing another computer

Graphic Use:

- Use second display for palettes/tools

Data Entry Use:

- Type documents on one screen while viewing reference material on the other

Wall Street:

- Use a notebook for viewing multiple screens

- View charts and live data at the same time

Entertainment:

- View videos/TV on one screen and your desktop on the other screen

Requirements

Operating System:

Windows XP Home or Professional, Windows XP Tablet Edition, Windows 2003 Server

Available USB 2.0 port (not compatible with USB 1.x)

Package Content

- 1 - USB to SXGA Adapter
- 1 - Quick Start Guide
- 1 - CD-ROM with User Guide and Installation Software
- 1- 4ft USB 2.0 Cable

Specifications

Function	GUC2015V
USB Specification	2.0 compliant
Humidity	20-80% RH, (Non Condensing)
Video Resolution	1280 x 1024
Power Connections	Optional Power Port
Operating Temperature	68 ~ 122 ° F (20 ~ 50 ° C)
Storage Temperature	32 ~ 158 ° F (0 ~ 70 ° C)
Operating System Support	Windows 2000, XP
